

INPUT

- Typhoon tweet archives
- Pretrained multilingual encoder
 - Single-task baseline models
- Training methods under comparison
 - Benchmark hardware testbed

PROCESS

1. Baseline analysis
2. Corpus construction
3. Empirical benchmarking
4. Comparative validation

OUTPUT

- Multi-Task Corpus of Taglish Disaster Tweets
 - Trained triage model
- Per-stratum evaluation scores (accuracy, F1)
 - Negative-transfer findings (p -values)
- Serving efficiency profile (t_{exec} , throughput, M_{RAM})
